

## Jan Strybol

Deputy Secretary General  
European Industrial Gases Association (EIGA)

Jan Strybol has worked in the industrial gases sector for over four decades, currently holding the position of Deputy Secretary General at the European Industrial Gases Association (EIGA) since 2019. Prior to this, he spent 36 years at Air Products NV, where he held various roles including European Regulatory & Technology Senior Advisor, Global Medical Technical Manager, European Hydrogen Project Manager, and Facility Manager for European Packaged Gases Operations. His responsibilities covered project engineering, customer installation and maintenance, and operations management across multiple regions including Europe, the United States, and Brazil. He also completed military service in Germany, focusing on logistics.

His academic background includes degrees in Mechanical Engineering from the University of Gent, Computer Science from the University of Brussels, and an MBA from Antwerp University. He has also received training in communication and leadership from Dale Carnegie and holds a proficiency certificate in English from Cambridge University. Jan has contributed to international regulatory and standardization efforts through organizations such as ISO, CEN, and the United Nations, particularly in the area of dangerous goods transport. His publications address topics related to medical gas systems and compliance, and he has participated in the evaluation of hydrogen innovation projects. His work has involved both operational and legislative aspects of the industrial gases industry.
